Overview

The progress bar is typically used when an application performs tasks such as project progress or sales activity. Users of an application might consider an application non-informative if there is no visual cue. By using the progress bar in your SharePoint lists, you provide the user with the rich and live information related to the status of values in your lists. Generally, data looks more comprehensively and user-friendly due to much clearer display of values in the form of progress bar.

✓	Month	Grade 1	Grade 2	Required quantity	Form 1A	Form 1B	Form 1C
	Jan, 17	10	15	100	10.00%	15.00%	25.00%

Why ArtfulBits Progress Column?

ArtfulBits Progress column allows you to display percentage value as progress bar. Full customization allows you to set look and feel of progress bar correspondingly to your site theme.

How to Use

To use Progress column you must select appropriate option in the list of available columns in the Create Column page. In the Progress Special Settings you must specify the minimum, maximum and default value (these default values are applied when you create new item). Remember, that minimum value should be less than maximum value and default value should be within limits of those two previous. In the Progress Style Settings section you can change default settings in order to adjust column mode to your needs. For example, you can change width of the progress bar, progress color and background color, progress bar look (standard and professional), etc. In Progress value section, you can add different formulas where calculation is based on the other columns. It is worth noticing that negative percentage values are also supported in ArtfulBits Progress column.

Conversion

Progress column supports conversion from standard SharePoint Number column and vice versa (it allows editing content of Progress column in Datasheet view).

In order to convert Number Column to Progress Column, you should, first, create SharePoint Number column with items you need. The next step is creating new column and choosing "ArtfulBits Progress" type. In Column Conversion section, select your Lookup column (*from drop-down list*) and click 'Convert' button to convert it to ArtfulBits Progress column.

Column Conversion

Allows to convert an existing percentage SharePoint Number column to ArtfulBits Progress column. All existing data will be kept and not affected.

Select an existing Number column and click 'Convert' button to convert it to ArtfulBits Progress column

Select a Column... ▾ Convert

OK Cancel

In order to **convert Progress Column to Number Column**, you should choose ArtfulBits Progress column in List Settings Page and click "Convert" button (in Column Conversion section) to convert current column to standard SharePoint Number. Converting will keep the Progress settings when converting into a SharePoint Number column. Conversion of ArtfulBits Progress column to standard Number allows editing content in Datasheet view.

Column Conversion

Allows to convert this column to standard SharePoint Number column. All existing data will be kept and not affected, only special ArtfulBits Progress column settings will be lost (safe operation).

Click 'Convert' button to convert this column to standard SharePoint Number column
